

## Chapter Skills Review

### Developing Multimedia Presentations

### Learning the Skill

One way to make a presentation informative, but also interesting and fun, is to combine several types of media into a multimedia presentation. A multimedia presentation involves several types of media. It may include photographs, videos, or sound recordings. The equipment for a multimedia presentation can include cassette players, overhead projectors, VCRs, or computers.

### Practicing the Skill

**Directions:** Suppose your assignment is to create a multimedia presentation on Saskatchewan. Use the planning guide below to make decisions for your presentation. Use additional sheets of paper if necessary.

1. List two main ideas you want to cover in your presentation. \_\_\_\_\_  
\_\_\_\_\_
2. Which forms of media can you use in your presentation? Which types does your computer support? Where can you find the different media being used in the presentation?  
\_\_\_\_\_
3. List which media you would use to help illustrate your first main idea, and how you would use each type.  
\_\_\_\_\_
4. List which media you would use to help illustrate your second main idea, and how you would use each type.  
\_\_\_\_\_

### Applying the Skill

**Directions:** Create an outline for your presentation by filling out the blank table below.
